In the pre-convention fights the committee developed that Senator LaFoliette had apent \$48,900; Governor Harmon, \$122,000; Governor Wilson, \$208,000; Speaker Clark, \$45,948, and Representative Underwood, \$52,000.

The committee found that the following contributions to the Colonel Roosevelt cause had been made:

William Flinn, \$144,000; Dan Hanna, \$117,000; Frank A. Munsey, \$118,005, and Georke W. Perkins, \$123,000.

Chairman Clapp said to-night that the investigation is stayed only temperarily and will probably he resumed in November, or immediately after Congress reconvenes in December.

Dr. Hartman Makes Public the Facts As to What Doctors Think of Peruna

S. B. HARTMAN, M. D.

Of course doctors disagree about Peruna, the same as they do on all other subjects. It is generally thought that the doctors are unanimously opposed to Peruna. It is well known hat Peruna has cared a great many cases after doctors have given them up. This would naturally excite animosity or jealousy on the part of the doctors. Then it is a fact that the average doctor is opposed to ready-made medicines of all kinds. They know very well if a bottle of medicine is know very well if a bottle of medicine is sold at the drug store that means that some doctor loses a prescription and per-haps a patient. So they are generally opposed to patent medicines, or ready-made medicines, as they call them.

But ever since Peruna has been sold But ever since Peruna has been sold I have known of many doctors who are in favor of Peruna. Some of them believe in it secretly, others openly. All this time I have been receiving letters from regular practicing physicians offering to send me testimonials as to the virtues of Peruna, provided I would pay them for doing so.

It is nothing unusual that a doctor should expect pay for such a service. The manufacturers of so-called ethical preparations advertised in the medical journals, used by the doctors only, are best known diplomats in the Balkans, made this statement here to-night.
"In fact." he continued, "the Balkan rulers have already agreed on a division. The powers have known all about it from the first. They don't really think they can prevent us from profiting by the war. No, we anticipate no trouble with Austria."

That the powers are aware the Balkan states plan a big territorial grab kan states plan a big territorial grab where Peruna has made marvelous cures, and are wilsing to furnish me the facts if

The town itself is important and was no great importance.

The town itself is important and was strongly fortified and garrisoned. Its capture cuts the Turks off from rail communication with the Northwest gives the Servians a foothold in the heart of Albania, will render a conjunction comparatively easy between them and the Greeks, advancing from the southward, and what is perhaps worse than anything elsa is a stunning blow to Turkish military prestige in still another large section of the country.

The Montenegrins were still shelling Scutari at latest accounts, and a Constantinople dispatch admitted that the stantinople dispatch admitted that the

ENGRAVING

I recently received such a letter from Kentucky, from a doctor who says he has been practicing medicine for a quarter of a century, and is at present "medical referee for this county, president of the county medical board, local surgeon of the C. & O. railroad, member of he state medical society and American Medical Association," and all that. He has used Peruna and offers to give me a very remarkable testimonial if I would pay hom fo doing so. He does not set any price, but expects me to offer him something, which, of course, I refused to do. He said, "I have been afflicted with a subacute inflammatory condition of the postnasal space, and of recent years the larynx has been involved in the catarrhal process. You Peruna entirely relieved me of both conditions, after a comparatively short time of using it. To-day I am the happiest man alive. Medical men will hardly believe me when I tell them that your medicine cured me, but it is a fact. Nevertheless I had tried for fifteen years every known means, took treatment at several sanitariums." He is willing to take oath to these statements if I will make it worth his while to do so. It was very gratifying to receive such a testimonial from a brother physician

It was very gratifying to receive such testimonial from a brother physician of refus ng to pay any one for a testimo-nial. Nothing would sooner ead to in-sincerity and embarrassment than to offer pay for testimonials. I should be flooded with testimonials of all sorts, and in spite of every precaution some of them would be untrustworthy.

In referring to the doctor's letter I do not consider hat I am violating the ordi-nary courtesies and confidences of private correspondence. I have not made use of his name or the town where he resides. But I am perfectly willing to communicate the name and address by private correspondence if any one wishes me to do so, or submit the letter for examination to any inquirer who may call at my office. And I may say the same in advance of the next letter that I am about to refer to. to refer to.

Another doctor from North Caro-lina writes me. He says: "I have a case under observation now permanently case under observation now permanently cured by Peruna that has baffled the medical profession ever since the disease was known.' He says, "I have successions advertised in the medical used by the doctors only, are table to paying doctors for testibility of paying doctors only, are the paying doctors for testibility of paying doctors for testib to the public, as well as the greatest advertisement ever given any medicine on the ma ket." He says, "I can furnish a sworn statement of the particular case and give you the greatest ad. for Peruna ever known for any remedy. The disease cured in this case is regarded be the profession as incurable. I prescribed the Perusa wyelf and know all the particulars. The papers had consulted leading medical authorities, had taken the most modern treatment, and verything failed, not even obtaining relief. He had also applied for insurance, and upon examination was rejected. After taking the Peruna treatment for a few months he again applied for insurance, was exhe again applied for insurance, was examined and accepted. This was one year ago, and now he is still well." The doctor

I am citing these cases not to disparage the doctors who have written these letters, but rather to show that doctors in good standing, in spite of their prejudice against Peruna, scores of doctors have been convinced of its value I am a doctor myself. I have probably

I am a doctor myself. I have probably treated more patients than any one doctor in the State in which I live. I doubt if there are many doctors in the United States who have treated more cases. I have long been convinced that Peruna is the best remedy obtainable for catarrhal diseases. I have seen thousands, yestens of thousands, of people recover from catarrhal ailments by the use of Peruna. I cannot believe otherwise than that Peruna is to-day the best remedy that has ever been devised for catarrhal diseases.

I am not sure but that I will have my files searched for similar letters to the files searched for similar letters to the ones I have alluded to, for there are a great many of them filed away. I may publish a book containing a large number of testimonials given me by doctors, which I have withheld from the public because I was not willing to pay any one for writing a testimonial, however valuable it might seem to be. Of course will not use this booklet for public advertisement, since I have not the doctors. tisement, since I have not the doctors consent to do so, but it will be sent through the mails to those only who request it, chiefly to the medical profession.
